Presentation

The Annual Colloquium in Physics for a Future in Research and Industry (SAPHARI) is an event showcasing different avenues for physics students in both academical research and in industry. This year, it will be held on March 8 - 9, 2018. The SAPHARI is a platform for research and industrial conferences along with networking and scientific posters sessions given by graduate students and physicists, mathematicians, chemists and informaticians from the industrial, governmental and academical fields. Networking sessions will last about 3h each day.

The various topics presented, the enterprises invited as well as today’s employment reality were major considerations for the planning of the SAPHARI’s programming this year. For this purpose, we have improved the event compared to last year’s edition by following the scientific trend in the academic and industrial fields which is to promote interdisciplinarity. To do so, we invited students from other scientific backgrounds like mathematics, informatics and chemistry to attend the event and the posters sessions.

Lunch and snacks are offered throughout the whole event and cocktails will end the networking sessions. In order to encourage people to talk about their results and to refine their vulgarization skills, prizes will be given to award the best presentations. A jury will be formed to choose the best posters which will be also awarded. The networking sessions will be held at the same time and place as the posters sessions. This will be an ideal moment for both students and enterprises to create relations. Your enterprise’s contribution would help with the event’s funding while offering you a privileged access to students and researchers coming from more than 40 different research groups from Université de Montréal.

The president’s word

The SAPHARI is an event that I like very much and which is organized within the Physic’s Department. I am thankful to the students who organized the previous editions for they have put in a considerable amount of time to flourish these career days. This event wishes to be a direct response to the increasing need to know the professional perspectives after completing a degree in Physics because there seems to be no mainstream career path beyond graduate studies in science at the moment. From one point of view, this is encouraging because it is a testimony that scientific studies come with a highly considered set of skills that can be very useful for any enterprise. From another point of view, it can be stressful for students to not know exactly where all those years of efforts will go. Therefore, this year’s main priority is to deepen the relationships between academia and the industrial sectors by creating rich networking sessions and give a chance to enterprises to give a talk. I hope that the connections built during the SAPHARI remain for the following years and that choosing a science degree becomes an easy choice for future employees in the industrial sector.

Antoine Darveau Bernier - Ph.D. candidate
Partnership Options

Note: The logo area will be proportional to the amount given. If you have questions or you want a personalized plan, don’t hesitate to contact us.

### Gold Partner (only 1)
- 2000 $  
  - The SAPHARI will be named by this partner  
  - Gives the winning presentations’ prizes.  
  - All advantages of a Silver partner.

### Silver Partner (maximum 2)
- 500 $  
  - 45 minutes presentation (can be adjusted) about your enterprise, your products and give employment perspectives.  
  - Presentation of your enterprise in the event’s pamphlet (1 page maximum).  
  - All advantages of a Bronze partner.

### Bronze Partner
- 200 $  
  - Stand during networking sessions (table and panels to show promotional material during networking sessions). Possible to bring your own material.  
  - Logo presence (event, social networks, website, pamphlet).  
  - Facebook post appearance.  
  - Enterprise is thanked before all networking sessions.  
  - Enterprise’s logo projection during the networking sessions alongside a picture of a representative coming to the event to facilitate first contacts.
Preliminary budget
