CIDRE

Cocktail InterDisciplinaire en Recherche et en Entreprises

Partnership Plan
Université de Montréal, 2019
You are cordially invited to the Interdisciplinary Cocktail for Research and Industry (CIDRE) taking place during the annual symposia in physics and mathematics of the Université de Montréal. The goal of the networking session is to build connections between industry representatives and student-researchers wishing to transition towards the industries.

This is an ideal opportunity to recruit future employees possessing great versatility, dynamic personalities, and various other skills (e.g. programming, data management, problem solving). Participating would give your company a privileged display in front of students coming from a large variety of research groups of the Université de Montréal. Note that several companies had the chance to recruit interns during last year’s event.

To give your company a greater visibility or simply to support the event, we invite you to take a look at the different categories of partnership displayed on the following page.

Hoping to see you at CIDRE,

Sincerely,

The organizing committee.

Place: Agora Morris et Rosalind-Goodman de l’Université de Montréal (Pavillon Jean-Coutu)
Date: Friday, March 8, 2019
Time: 17:00 à 20:00
